

Sanjay Bhandari

Front-End Developer

Aspiring React Developer with a strong foundation in React core and a genuine passion for creating interactive and user-friendly web applications. I am actively seeking an internship opportunity to apply my classroom-learned React skills in a practical setting. Eager to join a collaborative team, tackle real-world challenges, and expand my expertise in front-end development.

EDUCATION

Masters in Computer Application

Graphic Era Hill University

08/2021 - 08/2023

Dehradun, Uttarakhand

Bachelors of Science

Kumaon University

08/2016 - 08/2019

Nainital, Uttarakhand

PERSONAL PROJECTS

Employee Management App(React & SpringBoot)

- Employee Manager is a full-stack CRUD Web application using React as frontend and spring boot as backend which streamlines the process of managing employee information, tracking work assignments, and generating performance reports.
- It uses MySql as database to create and maintain detailed profiles for each employee which can store personal information, contact details, job history, and other relevant data.
- GitHub: <https://github.com/sanjay-ssb/EmployeeManager>

Personal Portfolio(React)

- Link: <https://myfirstportfolio-github-io-852h-ggp9ch1r5-sanjay0101.vercel.app/>
- Built a portfolio with React encapsulating diverse range of projects that highlight my proficiency in various aspects of software development and serves as a digital resume and portfolio for individuals seeking to showcase their skills, projects, and experiences in a visually engaging and interactive manner.
- GitHub: github.com/sanjay-ssb/myfirstportfolio.github.io

Smart Farming Web App(React)

- Fully responsive and dynamic website to teach farmers the basics of smart farming and it's various techniques while aiming to build a healthy community.
- A Web App built with React is a modern digital platform designed to enhance agricultural practices and streamline farm management. It leverages the power of web technologies to provide farmers with intelligent tools and insights for more efficient and sustainable farming operations.
- GitHub: https://github.com/sanjay-ssb/Smart_farming

Smart Contact Manager(Java)

- The Smart Contact Manager is a Java application that allows users to organize, store, and manage their contacts in an efficient manner. It provides features for adding new contacts, viewing existing contacts, and searching for contacts based on name or phone number.
- It uses MySql Database for database management, Bootstrap and Thymeleaf for creating user interface and SpringBoot framework for rapid development.
- GitHub: <https://github.com/sanjay-ssb/smartcontactmanager>
