Front-end Developer

Fresher

CORE KNOWLEDGE & SKILLS

JavaScript (Programming)	React	Java (Programming)
Spring Boot	CSS	HTML
Bootstrap	Rest APIs	GIT

Personal Projects

❖ **Smart Contact Manager**

Framework/Library: Bootstrap, Spring Boot
Database: MySQL

Descriptions:
- Built a Java-based web application for a business with features dedicated to the streamlined organization, storage, and efficient management of contacts.
- Ensured responsiveness by using Bootstrap and leveraged Thymeleaf to dynamically generate and manipulate content.
- Developed separate dashboards for users and administrators.
- Integrated TinyMCE to allow users to input and format rich text content.
- Implemented pagination to manage and display large sets of data in a user-friendly manner.
- Implemented a mechanism for generating and verifying OTPs using email for user authentication.
- **GitHub Link:** https://github.com/sanjay-ssb/smartcontactmanager

❖ **Personal Portfolio**

Framework/Library: React
Database: MySQL

Descriptions:
- **Live Demo**: https://myfirstportfolio-github-io-852h-ggp9ch1r5-sanjay0101.vercel.app/
- Created a dedicated section to showcase projects possibly with images and links to the project repositories and live demos.
- Incorporated interactive elements like hover effects, transitions, or animations to enhance the user experience.

- Implemented form validation to ensure that user inputs are correct before submission.
- Added a contact form allowing visitors to reach out to you directly through the website.
- **GitHub Link:** https://github.com/sanjay-ssb/myfirstportfolio.github.io

❖ **Employee Management App:**

Framework/Library: React, Spring Boot, Bootstrap
Database: MySQL

Descriptions:
- Utilized Bootstrap 4 for responsive and consistent UI design.
- Created endpoints for retrieving a list of employees, adding, updating, and deleting employees.
- Utilized REST API calls to fetch and update data between the React frontend and Java Spring Boot backend.
- Configured routing in the React app to enable navigation between different components/pages.
- Implemented components for adding, updating, and deleting employees, enabling full CRUD (Create, Read, Update, Delete) functionality.
- Ensured a clean and user-friendly design for the React components, providing an intuitive user experience.
